MARTEL INSTRUMENTS
VIDA Connect-It Technical Factsheet

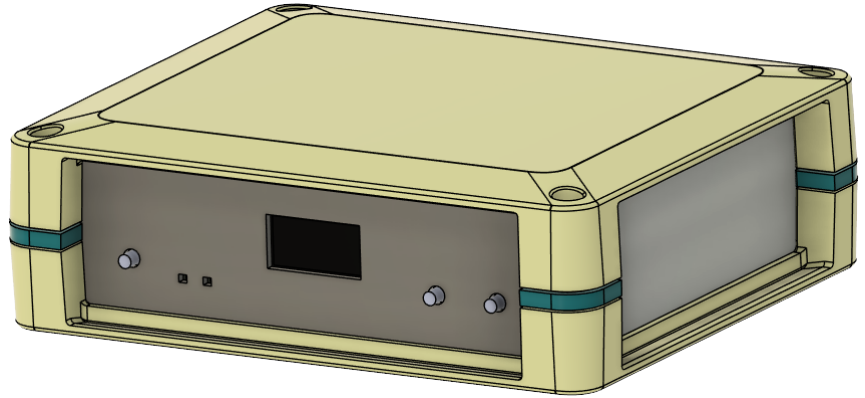

VIDA Connect-It is a modern, paper-less printer!

Connect-It connects to your workstation or equipment via USB and emulates a normal printer. Once connected, anything printed to the **Connect-It** is saved as a pdf and uploaded to a chosen network location or USB storage.

VIDA Connect-It removes the hassle of a paper-based workflow without having to change a thing!

This clever device will even emulate your current printer so that **no new printer drivers** need installing!
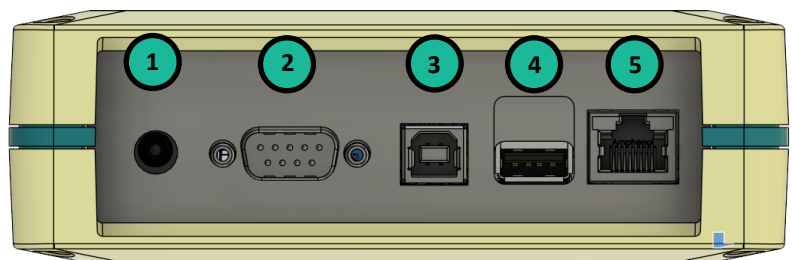

All **Connect-It** configuration is done through a user-friendly, browser-based interface. After configuration, **Connect-It** will appear on your device just like your old paper-based printer.

Connect-It is your device—it will **never** automatically update or attempt to communicate outside your network.

Specifications

Processor	ARM Cortex A7, 200-530MHz.
Storage	8GB storage
Operating system	Linux-based Debian operating system
Screen	OLED status display screen
Dimensions	145mm wide x 125mm deep x 50mm high.
Weight	Approximately 400g.
IP rating	IP40 equivalent rating.
Temperature	0-40°C ambient (55°C absolute maximum).

Wireless connections

WiFi	2.4GHz 802.11b/g/n. Server and client mode support.

Physical connections

Label	Connector	Function
1	DC Jack (5.5mm)	Power supply. 5V DC centre positive.
2	9-way D-Sub	RS232 serial port. Software configurable.
3	USB-B	USB printer connection.
4	USB-A	USB external storage connection.
5	RJ45 8P8C	10/100 ethernet network connection.
